8 In order to resolve this case quickly and judiciously, the Arizona State Board of
9 Dental Examiners ("Board") and Glen E. Doyon, D.M.D. enter into this Consent
10 Agreement and Order ("Consent Agreement") in lieu of further administrative and
11 judicial proceedings. It is consistent with the public interest and the requirements and
12 statutory authority of the Board, specifically, A.R.S. §§ 32-1263.01, -1263.02, and 41-

14 Therefore, in lieu of further proceedings, Glen E. Doyon, D.M.D. admits and
15 understands that:

16 1. Any record prepared in this matter, all investigative materials prepared and
17 received by the Board concerning the allegations, and all related materials and exhibits

7. Dr. Doyon agrees to the Board approving the following Findings of Fact, Conclusions of Law and Order.

DATED this 30 day of April 2012.

Glen E. Doyon, D.M.D.

FINDINGS OF FACT

1. Dr. Doyon holds license no. D 6540 initially issued by the Board on June 6, 2005. Dr. Doyon's practice is limited to endodontics. Dr. Doyon also holds a permit to administer conscious sedation issued by the Board on September 25, 2006.

2. On July 20, 2010 Dr. Doyon evaluated patient ID for an endodontic procedure on teeth #'s 30 and 31. Dr. Doyon's treatment plan for ID included doing the endodontic procedure utilizing intravenous ("IV") conscious sedation.

3. Dr. Doyon performed the endodontic procedure on July 21, 2010. Dr. Doyon recorded 8:00 a.m. on the anesthesia record as the completion time of the IV

1 access and the start time of the endodontic procedure as 8:10 a.m. The recorded start
2 time of the anesthesia does not coordinate with the time recorded on the vital signs
3 monitor (the vital signs monitor time was not coordinated with the actual time of day).

4 4. Dr. Doyon failed to properly respond to the monitor of ID during the
5 endodontic procedure. According to the vital signs printout sheet, the SAO2 recordings
6 were suboptimal for the majority of the procedure. The suboptimal SAO2 recordings
7 were noted continuously for over 30 minute increments with the SAO2 never recorded
8 above 90%. This includes the last hour of the procedure in which only one recording of
9 the SAO2 was above 90%.

10 5. At the time of the last pulse oximetry reading at 11:05 a.m., ID's vital signs
11 revealed mild hypertension, tachycardia and suboptimal SAO2.

12 6. During the procedure Dr. Doyon failed to recognize that he had
13 administered levels of medication to ID that represented a failure of conscious IV
14 sedation.

15 7. ID expired the evening following the endodontic procedure.

16 8. Dr. Doyon stated he administered multiple doses of Morphine "in an
17 attempt to prevent pain and smooth out the sedation." This contributed to respiratory
18 depression.

19 9. Dr. Doyon failed to recognize that ID was not amenable for IV sedation.
20 Based on this, Dr. Doyon administered higher levels of sedatives which had adverse
21 consequences for patient ID.

22 CONCLUSION OF LAW

23 The conduct and circumstances described in the above Findings of Fact constitute
24 unprofessional conduct as defined by A.R.S. § 32-1201 21(n). Such conduct is grounds
25 for discipline under A.R.S. § 32-1263(1).
